

# EPDM Rubber Gasket Material 60 Durometer

---

*EPDM is an excellent general purpose rubber. It has excellent resistance to heat, cold, ozone, and ultraviolet light. This makes an excellent material for outdoor applications. EPDM also has excellent chemical resistance. EPDM contains excellent electrical and dynamic properties.*

*A unique characteristic of EPDM is it's resistance to Ozone. It's why the auto industry has been sealing your windows with EPDM seals for years. The material generally lasts 20 years in sunlight. EPDM also has good chemical resistance, and electrical properties. Good up to 220°F, animal fats, water, even low temp steam.*

**Not oil resistant. Tensile strength of 800 PSI. Durometer: 60 +/-5.  
Temperature range: -20°F to 220°F.**
